Q-Tec Product Range

Residential:
Filters, Filter Housing, Membranes, Membrane Pressure Vessels, Pumps, Fittings, Seals, Other Components and Accessories

Industrial:
Filters, Filter Housings, Multipoint Valves - Manual & Automatic, Membranes, Membrane Pressure Vessels, Boda Motors, Pumps & Other Accessories

Residential Membranes:

UF Membranes:
Features:
- Permanent membrane
- Hydrophilic surface
- Excellent permeability and low flux
- Chromatovascular
- Pure water permeance between 0.01 and 0.5

Advantages:
- Effective, removes most particles, pathogens, microorganisms, and colloids below the rated size
- Produces high-quality water with low amount of energy
- Lower operating cost & energy cost
- Longer lifetime than RO
- Easier to handle and maintain
- Chemicals (A), when not used can be cleaned

Applications:
- Industrial water purifiers
- Industrial water
- Industrial water
- Industrial water

RO Membranes:
Features:
- The membrane element is supplied in dry condition for more shelf life (up to 12 months)
- The life of membrane sheet is made in USA
- The size of element is 15 x 15
- The membrane is manufactured by M2 membranes
- RO certified by TUV-SRM standard for experimental parameters

Advantages:
- Faster and reliable operation
- There are no adverse effects
- High-quality water
- RO-Quality Control System

Applications:
- Residential Drinking Water Purifiers (RO)

Industrial Membranes:

UF Membranes:
Features:
- Designed for a wide range of water treatment plants
- Consistently improves water quality
- High-quality water
- RO-Quality Control System
- High-pressure pumps & high-quality material

Advantages:
- Higher throughput and reliability
- The membrane can be used in all types of applications
- Used in combination with RO and UF pumps, it has a strong durability on microorganisms, solids, and sediment

Applications:
- DI Series Industrial Water RO Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements
- DI Series High Pressure Industrial Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements

RO Membranes:
Features:
- Excellent performance, wide flow range and long membrane life
- Design ensures reliable operation and easy cleaning, when using RO membrane
- We can produce the membranes in a variety of sizes up to 20 x 20
- We adopt standard dimensions used all over the world to facilitate replacement between different types of membranes

Advantages:
- Better performance and reliability
- The membrane can be used in all types of applications
- Advanced technology
- 100% state-of-the-art and internationally standard

Applications:
- DI Series Industrial Water RO Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements
- DI Series High Pressure Industrial Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements
- DI Series Low Pressure Industrial Membrane Elements
